

PIANO WIZARD
www.pianowizard.com
\$199.95

Summer is a good time to learn something new, like how to play the piano. But most kids hate to practice. You don't even have to buy a piano because the Piano Wizard comes with a full-sized MIDI M-Audio keyboard. And the Piano Wizard program is a video with the beginning lessons of piano (but your kids will never know it because it's so much fun). In fact this is so fun that adults who have never had one lesson can begin to play tunes the first session. Comes with color-coded stickers for the keys for "duh-proof" play. Once you work your way through the Easy Mode the Wizard Premier enables users to download unlimited MIDI song files and play along. Since music programs are almost non-existent in public schools the Piano Wizard is a perfect way for parents to provide piano lessons for tons of summer fun.

CYBERLINK POWER DVD
www.cyberlink.com
\$59.95

For a great DVD experience on your PC try Cyberlink Power DVD. Of note it supports all the latest file formats, including H.264, MPEG-2 HD, WMV HD and DIVX Pro. Travelers will like the "beat the clock" feature, which fits movie into remaining battery time auto reserve let's you pick up while you left off. Set up a home network and share with home theater system.

ACRONIS DISK DIRECTOR
www.acronis.com
\$49.99

Partitioning your hard disk may not seem like your idea of fun but if you use Acronis Disk Director, it will enable you to split and merge partitions, install and boot multiple operating systems. There are actually four products within this program; Partition Expert, OS Selector, Recovery Expert and Disk Editor. The \$49.99 download is well worth the price.

GOODSYNC
www.goodsync.com
\$19.95

Here is a utility that really works! If you don't want to spend your summer worrying about whether all your contacts from your desktop are syncing with your PDA, cellphone etc. don't stress, pick up GoodSync so you can start syncing FOLDERS not just files! Super easy to use and for the price a steal!

MEDIA ONE GALLERY
www.intervideo.com

\$49.95

With all the different media file formats most PC hard drives are drowning in images, videos and data files. Media One is just that, it puts all your media in ONE gallery. Cameraphones have added to the mass of new images. The device manager also addresses cameraphones, a new source of images that can get out of control. There is also the ability to read and input media from any device that plugs into a PC and isn't that what you want from a digital media program?
