

THE BEST GADGETS AND GIZMOS ON THE PLANET 2007

# TREK

WIRED

2007

## PIANO WIZARD PREMIER SOFTWARE

So what if you're more comfy mashing buttons than tickling the ivories. Unleash your inner pianist with the Wizard. This onscreen piano teacher disguises notes as space ships and dinosaur eggs. Includes an M-Audio Keystation. \$200 [www.pianowizard.com](http://www.pianowizard.com)

## PLANTRONICS GAMECOM X30 HEADSET

Yes, you look ridiculous with Microsoft's Xbox Live headset strapped to your dome. Feel slightly less nerdtastic with the sleek but flimsy noise-canceling Gamecom X30. If only it were wireless. \$40 [www.plantronics.com](http://www.plantronics.com)

## DATTEL PSP HARD DRIVE

This power supply doubles the PSP's battery life and features a 4-Gbyte hard drive for storing media and home-brew programs. Recommended only if you can handle the added girth. \$199 [www.datel.co.uk](http://www.datel.co.uk)

## PYRAMAT ROCKER S2000

The S2000 gaming chair blasts sound from dual, shoulder-level, 8-watt speakers and a 30-watt subwoofer into your backside. It works with PCs, consoles, TVs, and more – but its hard surface is literally a pain in the butt. \$199 [www.pyramat.com](http://www.pyramat.com)
